

RECORDING CHUK130115D

Repeat three times in isolation. Repeat three times in carrier phrase Go? ____ inpi.

“I said ____.”

m-/n-/ŋ-/ɲ-/m/-n/-ŋ

The restricted occurrence of ŋ only in ŋa- and ŋo- and exclusively in words with cognates in other languages suggests a naturalised loan phoneme. Same might be true of ɲ, perhaps rather nɲ? But strange because not just nja but also nje, nju, njo, nji.

manda ‘achieve’/*manta

nanta ‘add’/*nanda

ŋanda ‘become defunct’/*ŋanta; ŋantak ‘premonition’

ɲanda ‘stretch’/ɲerta ‘temporarily stretch’/*ɲanta

‘mán’ ‘community’

maŋ ‘garlic’

naŋ ‘2SG, in’

naŋda ‘bark’

‘náŋda ‘do(H)’

hojdzon ŋanda ‘egg spoilt’/*ŋanta

ɲaŋbu ‘cat’/*ɲanta/*ɲanda

*luj

-aw/-ow/-iw

There is no *-uw/*-ew.

-iw only occurs in naturalised loans from Tibetan and onomatopoeia.

Duh. has -aw only monosyllabically and with onset h-, the rest is all -ow! In Khis. the occurrence of -aw is more common.

diw 'bullet' > WT

riw 'mountain' > TSH/WT

siw 'smallpox' > WT

hriw 'smallpox' > WT

hat^hiw 'sneeze' > onom.

p^hiw/psiw 'whistle' > onom.

ziwziw 'teemingly' > onom.
